HR & Hiring Automation

VERSION 2.0

Zapier Automated Hiring Pipeline

Upgraded with Delay · Email Notification · Digest · Daily Slack Summary

12	30 min	3	6 PM
Total Steps	Auto Delay	New Steps	Daily Digest

Prepared by: Gloria Njorteah | Glo_Innovate | March 2026

Full Zap Architecture — V2 (12 Steps)

UPGRADED

New in V2: Step 5 (Delay 30min) → Step 6 (Email Sales Manager) → Step 7 (Append to Digest) → Step 8 (Paths split — Senior / Junior)

The pipeline now has 12 steps — all qualified applicants pass through Delay + Email + Digest before routing to Senior or Junior tracks.

What's New in V2 — The Upgrade

V1 — Original Pipeline

Trigger on form submission
Formatter: Split name
Formatter: Extract experience
Filter: Python + 1yr + location
Paths: Junior → Sheets
Senior → Slack

- ✗ **No delay before action**
- ✗ **No email to Sales Manager**
- ✗ **No daily digest summary**

V2 — Upgraded Pipeline

Steps 1–4 unchanged

NEW ✓ Step 5: Delay 30 minutes
NEW ✓ Step 6: Email Sales Manager
NEW ✓ Step 7: Append to Digest

Step 8: Paths (now Step 8 not 5)
Junior Track → Google Sheets
Senior Track → Slack

SEPARATE ZAP ✓ Daily 6 PM digest

V2 adds 3 new steps (Delay, Email, Digest) before the Paths split — giving Sales Manager instant notifications for every qualified applicant.

5 NEW STEP — Delay by Zapier · Wait 30 Minutes

NEW IN V2

What it does

Pauses the Zap for exactly 30 minutes before proceeding to the email step.

Why it matters

Gives HR a short review window and spaces out notifications to avoid alert fatigue.

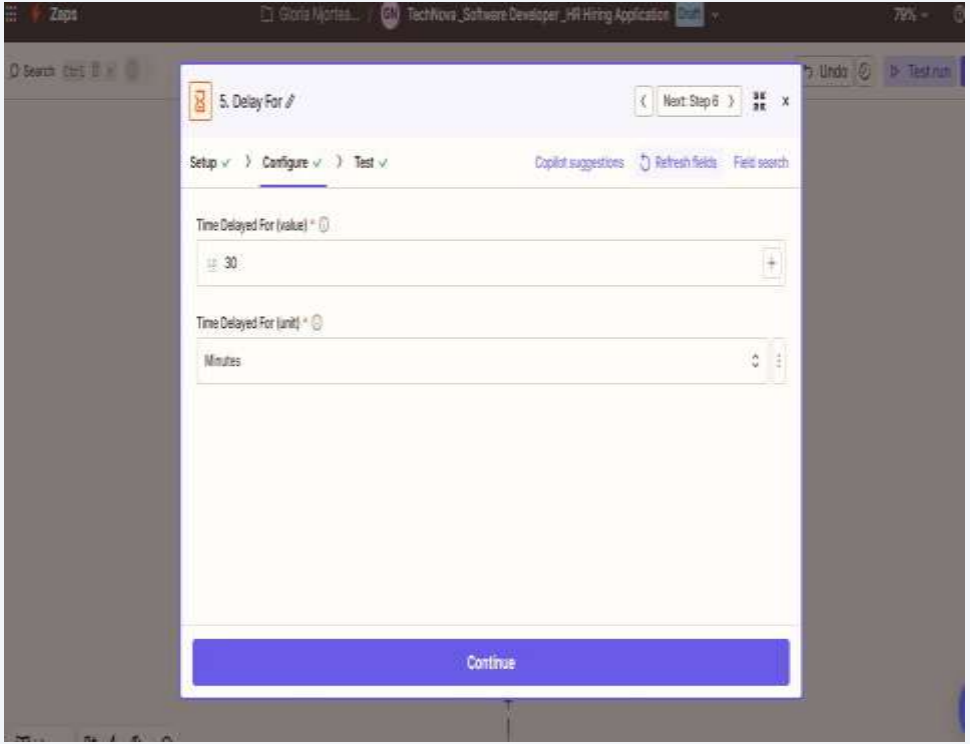
Config

Time Delayed For (value): 30
Time Delayed For (unit): Minutes

Position

Sits between Filter (Step 4) and Gmail (Step 6) — only qualified applicants reach this step.

SCREENSHOT — Step 5: Delay For (30 Minutes)

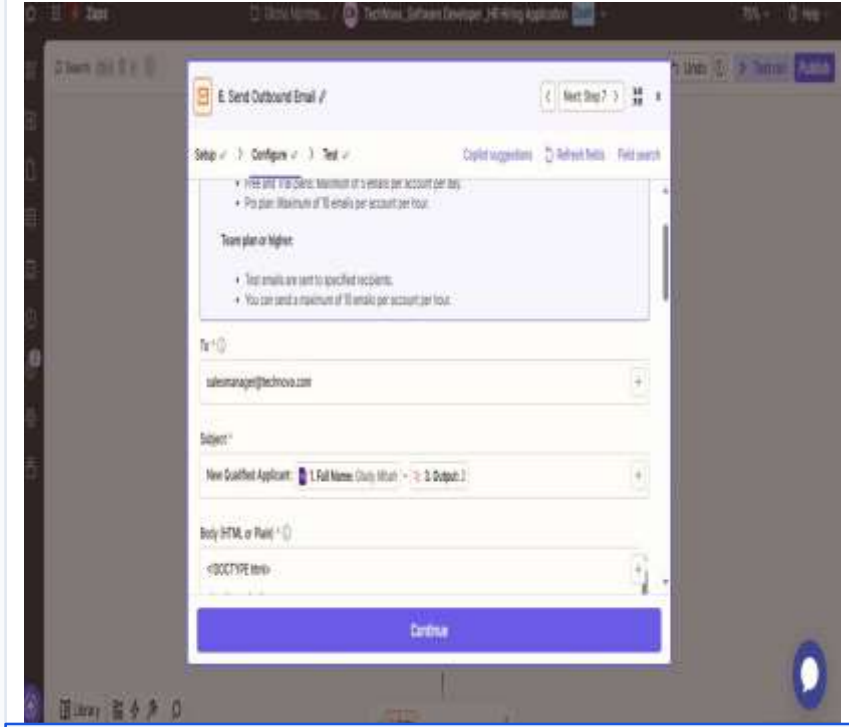


Step 5 (Delay) fires only after a form submission passes the qualification filter — zero delays for unqualified applicants.

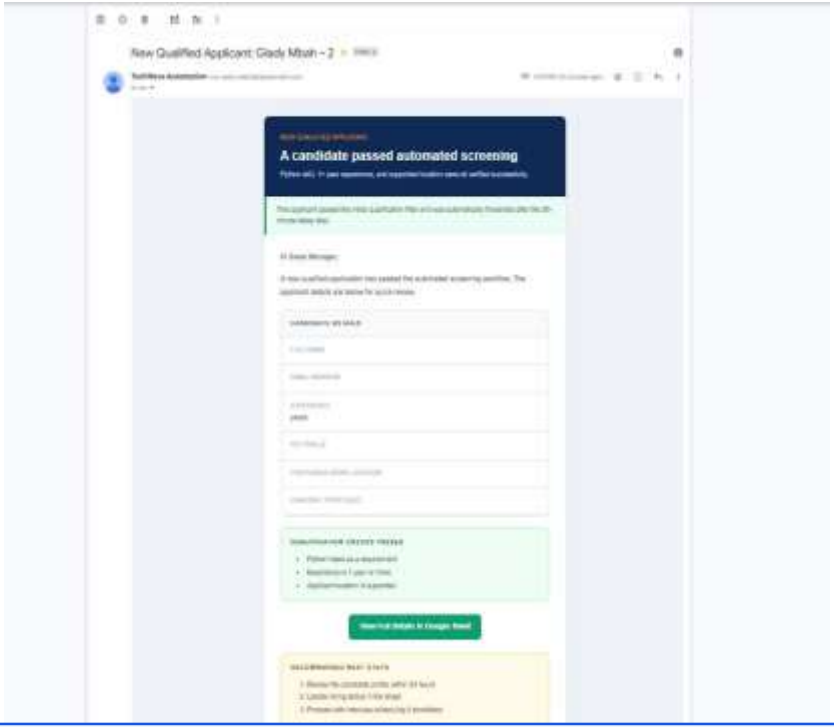
6 NEW STEP — Email by Zapier · Send to Sales Manager

NEW IN V2

Zapier Gmail Step Config



Email received in Gmail inbox



To: salesmanager@technova.com | Subject: New Qualified Applicant: {{Full Name}} – {{Extracted Experience}} years | Body: HTML email template

Step 6 fires after the 30-min delay — the Sales Manager receives a branded HTML email with full candidate details and filter pass confirmation.

7 NEW STEP — Digest by Zapier · Append Entry and Schedule Digest

NEW IN V2

Digest Name

"Daily Qualified Job Apps"

Entry Format

- {{First Name}} {{Last Name}} ({{Email}}) – {{Exp}} yrs – Skills: {{Skills}} – Location: {{Location}}

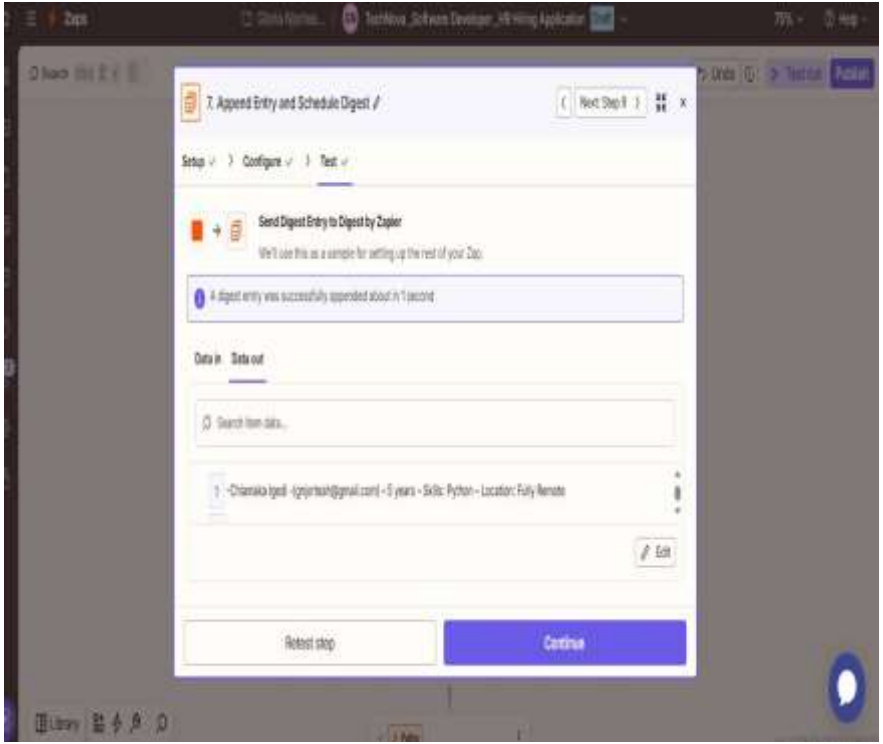
How it works

One line is appended per qualified applicant throughout the day. The digest holds all entries until released.

Used by

A separate daily Zap releases this digest at 6 PM and posts to Slack #hiring-daily-summary.

Step 7 — Digest test output (Zapier)



4 Step 4 — Filter Gate · Unqualified Applications Stopped Here

Python

Key Skills must CONTAIN 'Python'

Experience

Extracted number must be GREATER THAN 0

Location

Location does NOT CONTAIN 'Other (not supported)'

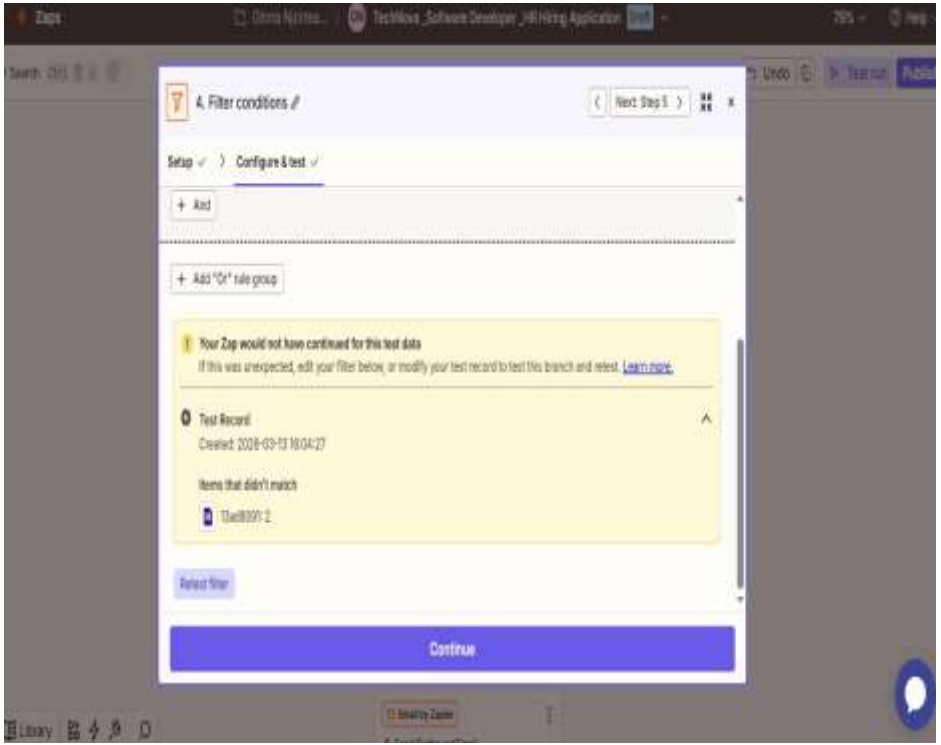
If any check fails

Zap stops here. No email sent. No Slack. No digest entry.

Why this matters

Protects Sales Manager from low-quality alerts and keeps task history clean.

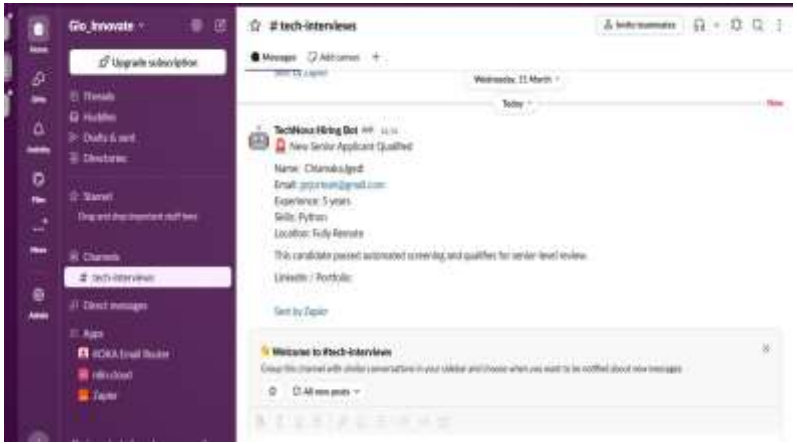
Filter stops unqualified Junior application



8 Step 8 — Paths · Senior Track → Slack | Junior Track → Google Sheets

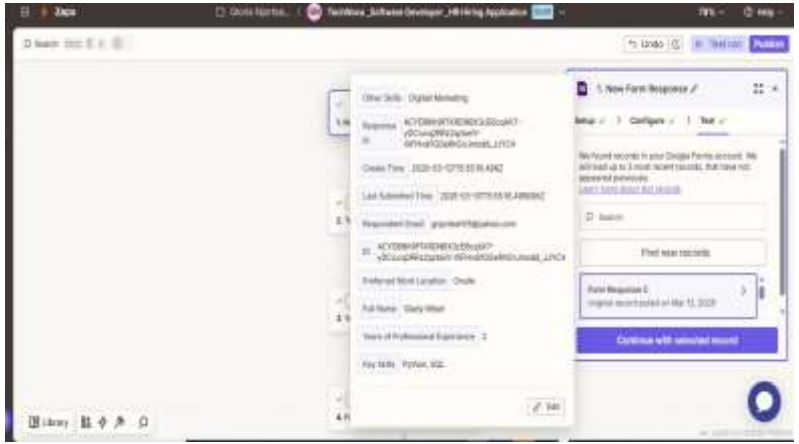
Path A — Senior Applicants (4+ yrs)

Condition: Extracted experience > 3
Action: Slack → #tech-interviews
Message includes: Name, Email, Experience, Skills, Location, LinkedIn
Sent by: TechNova Hiring Bot
Result: Tech lead sees notification immediately



Path B — Junior Applicants (1–3 yrs)

Condition: Extracted experience < 4 AND > 0
Action: Google Sheets → Junior Applicants tab
Columns: Name, Email, Experience, Skills, Location
Status: Auto-set to 'Pending Review'
Result: HR batch reviews sheet daily



Path A (Senior) triggers instant Slack notification to #tech-interviews. Path B (Junior) logs to Google Sheets for HR batch review.

Separate Zap — Daily 6 PM Qualified Applicants Summary

NEW ZAP

1 Schedule by Zapier

Step 1 of Daily Digest Zap

Trigger fires every day at 6:00 PM automatically

2 Digest: Release

Step 2 of Daily Digest Zap

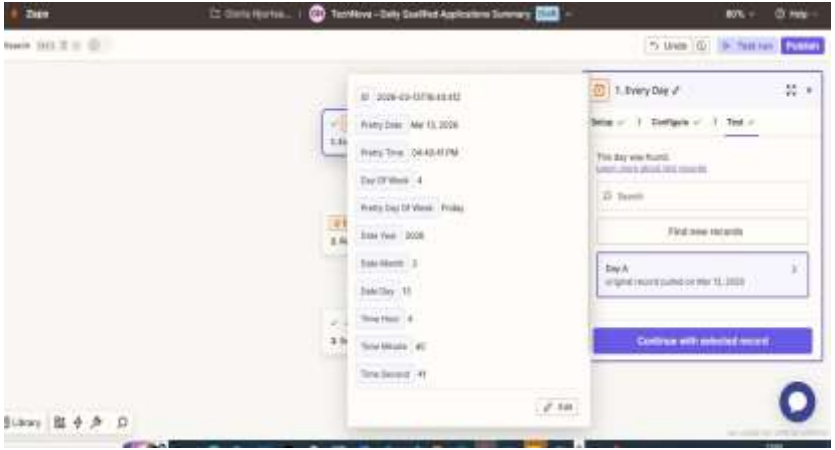
Pulls all queued entries from 'Daily Qualified Job Apps'

3 Slack: Send Message

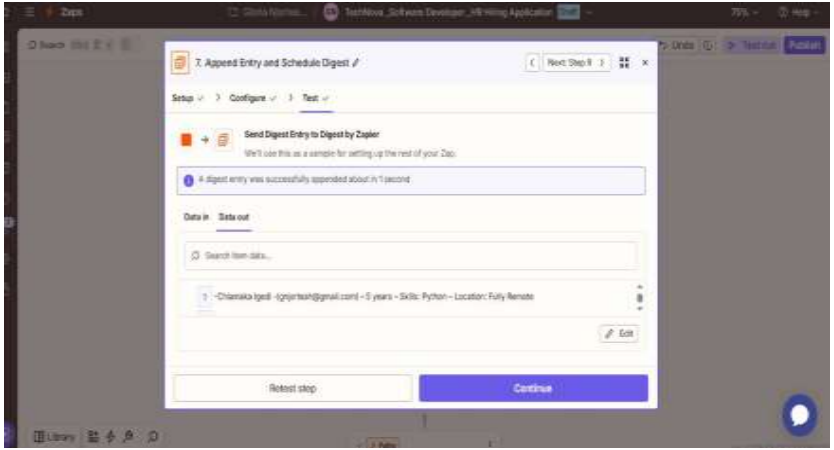
Step 3 of Daily Digest Zap

Posts full summary to #hiring-daily-summary

Step 1 — Schedule Trigger (Every Day, tested Mar 13)



Step 2 — Digest Append: entry confirmed in 1 second



The Daily Digest Zap is independent of the main Zap — it fires at 6 PM, releases all day's qualified entries, and posts to Slack in one clean message.

Step 3 — Slack Output · #hiring-daily-summary · Live Proof

LIVE TEST

Slack Message Contains

Header

Daily Qualified Job Applications Summary — {{date}}

Digest Entries

One formatted line per qualified applicant collected all day

Total Count

Total today: 2 applicants passed screening

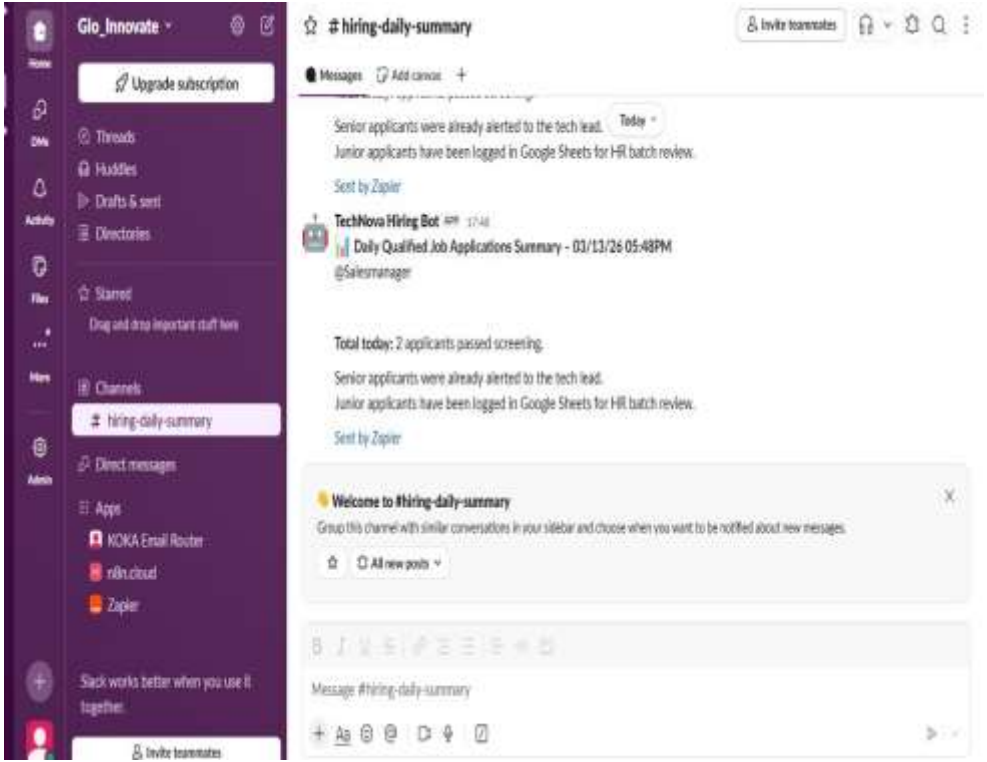
Track Summary

Senior apps alerted to tech lead. Junior apps in Google Sheets.

@Mention

@Salesmanager tagged for immediate visibility

Live Slack message — #hiring-daily-summary channel



TechNova Hiring Bot posted the daily digest to #hiring-daily-summary at 17:48 — 2 applicants confirmed, senior alerted, junior logged to Sheets.

End-to-End Flow — What Happens at Each Step

STEP 1–3 Form → Format

Google Form received
Name split, experience extracted

STEP 4 Filter Gate

Python + 1yr+ + location
Unqualified stopped here

STEP 5 Delay 30 min

Buffer window for HR
Zap pauses automatically

STEP 6 Email Manager

Branded HTML email
to salesmanager@technova.com

STEP 7 Append Digest

One line queued
for 6 PM batch release

STEP 8 Paths Split

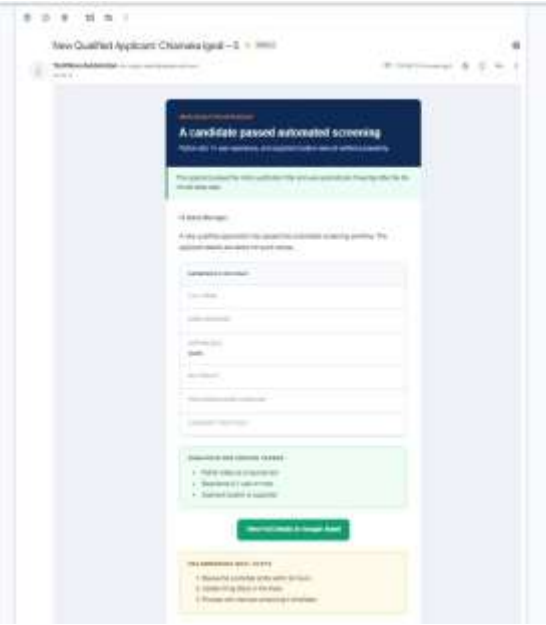
Senior → Slack
Junior → Google Sheets

STEP 6PM Daily Digest

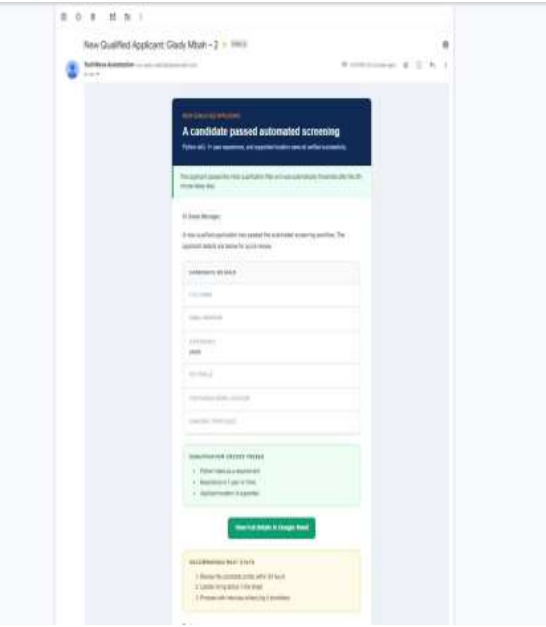
Schedule Zap releases
All entries → #hiring-daily-summary

Every qualified applicant triggers this full 7-step sequence automatically — from form submission to Sales Manager email, Slack, and daily digest.

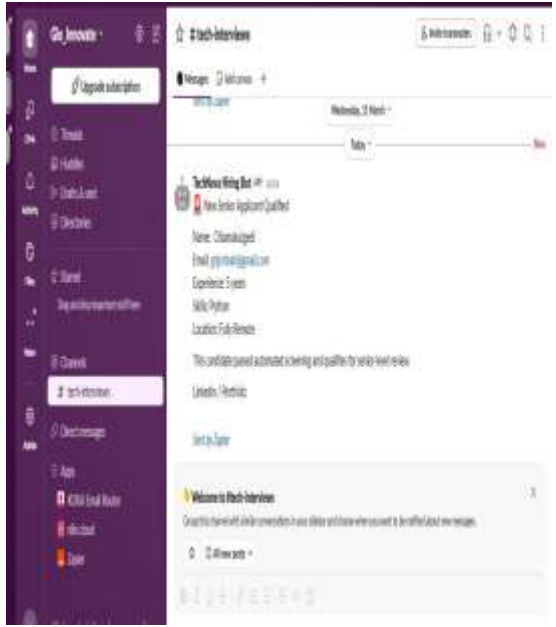
Live Test Results — V2 Pipeline in Action



Gmail inbox — HTML email received by Sales Manager



Full email with candidate profile & filter checks



Slack #tech-interviews — Senior applicant alert

✓ Filter passed · ✓ 30-min delay ran · ✓ Email delivered · ✓ Slack notified · ✓ Digest appended · ✓ 6 PM summary posted

All 6 V2 outcomes confirmed live — filter, delay, email, Slack alert, digest append, and daily batch summary all working end-to-end.

Tools & Stack — What Powers the Automation

Google Forms

Application intake — collects Name, Email, Experience, Skills, Location, LinkedIn

Zapier Formatter

Splits Full Name (Text) · Extracts experience number from free text

Zapier Filter

Gates on Python + 1yr experience + supported location — zero waste

Zapier Delay

30-minute buffer before email fires — paces notifications

Gmail by Zapier

Sends branded HTML email to salesmanager@technova.com with merge fields

Zapier Digest

Queues one line per qualified applicant all day for batch release at 6 PM

Zapier Paths

Routes: Senior (4+ yrs) → Slack · Junior (1–3 yrs) → Google Sheets

Slack

TechNova Hiring Bot posts to #tech-interviews and #hiring-daily-summary

Google Sheets

Junior Applicants tab and Remote Priority tab — HR batch review dashboard

The complete V2 stack uses 4 Zapier native apps + Google Forms + Gmail + Slack + Google Sheets — all no-code, fully automated.

Impact & ROI — V2 Value Delivered

What TechNova gains from the upgraded pipeline

0

Manual screening hours

Every qualified app is auto-notified

30s

Time to Sales Manager

After 30-min delay, email fires instantly

6 PM

Daily digest delivery

Batch summary to Slack every evening

100%

Automated routing

Zero missed applicants, zero manual sorting

Before V2

Manual email to manager each application
No delay — noise and alert fatigue
No daily summary — status unknown
Senior/Junior split required manual check

After V2

Auto email after 30-min delay (zero effort)
Digest queues all day — one clean 6 PM post
#hiring-daily-summary updated automatically
Paths auto-route Senior to Slack, Junior to Sheets

V2 eliminates all manual HR screening steps — the pipeline handles notification, routing, and daily reporting with zero human intervention.

V2 Summary & What's Next

TechNova Zapier Hiring Pipeline — Upgraded with 3 new automation steps

✅ Delivered in V2

- → Step 5: Delay by Zapier — 30 minutes
- → Step 6: Email Sales Manager (HTML)
- → Step 7: Append to Digest (daily queue)
- → Step 8: Paths — Senior (Slack) / Junior (Sheets)
- → Separate Daily Digest Zap at 6 PM
- → Branded HTML email template (candidate card)

🚀 Possible Next Upgrades

- → Add AI scoring step (ChatGPT/Claude API)
- → Auto-schedule interviews via Calendly Zap
- → Rejection email to unqualified candidates
- → LinkedIn job posting auto-sync
- → ATS integration (Greenhouse / Lever)
- → Weekly hiring report to leadership

Built by Gloria Njorteah | Glo_Innovate | Upwork: Glo_Innovate | AI & Automation Specialist | March 2026

V2 is fully tested and live. The pipeline now handles 12 steps autonomously — zero manual screening required.
